

W. Scott Tew

Executive Director

Center for Energy Efficiency and Sustainability, Ingersoll Rand

Scott Tew is the founder of the Center for Energy Efficiency & Sustainability at Ingersoll Rand (CEES) which supports all of the company's strategic brands — Club Car, Ingersoll Rand, Trane and Thermo King — and is responsible for forward-looking sustainability initiatives aimed at transitioning to more efficient and climate-friendly solutions, and minimizing resource use within company facilities.

In addition, Tew serves as a thought leader in linking public policy, economic impacts and a value-stream approach to sustainability. His recent efforts have led to the development of world-class initiatives including introduction of the company's comprehensive triple-bottom-line targets, the creation of the EcoWise™ product portfolio, industry-leading public commitment to combat climate change at the UN Climate Summit; and as a pioneer in integrated reporting. Most recently, Ingersoll Rand received the Best Environmental Stewardship Award from the US Chamber Foundation, obtained a perfect score on the global Corporate Equality Index and is the only industrial company to be listed to both the World and North America Dow Jones Sustainability Indexes for the past 8 years. Prior to this role, he led high profile programs to advocate for energy efficiency, green buildings and global greenhouse gas emissions standards and policies.

Tew holds graduate and undergraduate degrees in environmental science and ecology from Livingston University. He plays key roles in the World Environment Center; the Alliance to Save Energy; the Global Sustainability Centre (Europe); TERI Council for Business Sustainability (India); the US Business Council for Sustainable Development (USBCSD); and the Advanced Energy Economy (AEE). In addition, he is a member of the North Carolina Energy Policy Council and was recently named North Carolina Industry Leader of the Year in Energy by *Charlotte Business Journal* and is the recipient of the "Leading the Way" award in CSR by Corporate Responsibility Magazine. He is the author of myriad white papers related to energy efficiency and sustainable practices and contributed to the recently released book, *Practicing Sustainability*, by Springer Publishing.
